Risk Assessment

Risk Level: HIGH

Confidence: 0.85

Signals:

- A previous claim (CLM-2024-078, Policy ID: POLICY-123) was rejected due to being a detected duplicate, indicating a history of potential fraudulent activity or errors.
- The vehicle associated with the records (KA01AB1234) received an over-speeding violation on 2024-10-01, indicating a history of reckless driving behavior.
- The absence of 'imageAssessment' prevents a critical verification step for damage authenticity and assessment against common visual fraud indicators, such as reused or inconsistent photos.

Executive Summary

Analysis reveals a historical duplicate claim rejection for CLM-2024-078, which is a significant fraud indicator. Furthermore, the vehicle associated with the records (KA01AB1234) has a recent over-speeding violation. A crucial piece of evidence, 'imageAssessment', is missing, preventing verification of damage and assessment against visual fraud indicators.
